Reassuring roadshow – remains BUY

These are the key highlights following yesterday's management roadshow:

- Resilient portfolio.** While many real estate companies were hit hard during the COVID pandemic, DEMIRE's portfolio (65% office, 25% retail, 10% logistics) proved resilient reflected in only minor rent suspensions (€ 5.6m or 5.5% of target rent as per May 2021). While DEMIRE's office business was hardly affected by the pandemic supported by its high share of governmental tenants (i.e. Telekom), its retail exposure seems robust thanks to a sound mix (~ 50% exposure to "Covid winner" e.g. food retailer, DIY stores and 50% department stores).
- ABBA approach provides further potential valuation gains.** Portfolio resilience, especially compared to other German top locations, should have been also supported by the company's ABBA approach (i.e. A assets in B locations). Moreover, it should allow the company to continue to benefit from revaluation gains. That said, DEMIRE managed to dispose non-strategic assets (> 10) with a premium to market value of roughly € 17m (~12%) since 2019 providing financial headroom for further acquisitions or dividend payments (i.e. € 0.64 DPS in FY20, c. 14% yield).
- FFO I target of € 34.5 to € 36.5m in FY21E reiterated.** Funds from operations improved substantially (48% CAGR 2016-20) to c. € 39m last year thanks to material improvements in terms of portfolio size/ quality, a more favorable refinancing and reduced overhead costs. The company's guidance of a slight reduction in FFO I in FY21E mainly reflects recent asset disposals. Positively, this should be partly mitigated by the "Cielo" acquisition (office building in Frankfurt, acquisition costs € 85m providing an annual FFO of € 5m, 6% yield) and a further reduction of administration costs and interest expenses.
- NAV per share stood at € 6.01** as per end of March (eH&A € 5.75 at year-end FY21E). At a c. 25% discount to NAV valuation remains undemanding. Moreover, our impression was that the majority shareholder and management have a common understanding that a potential liquidity event could be supportive for a share rerating. Given that DEMIRE continues to pursue its growth strategy (i.e. > € 2bn portfolio vs GAV of € 1.4bn today, eH&A € 270m net acquisitions p.a.) and its debt maturity due in 2024, a potential capital raise seems likely, in our view (eH&A ~€ 250m in FY21E).

The stock remains BUY, unchanged PT of € 6 based on NAV and DDM.

1. General Information/Liabilities

This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by Hauck & Aufhäuser Privatbankiers AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of Hauck & Aufhäuser Privatbankiers AG. Reproduction of this document, in whole or in part, is not permitted without prior permission Hauck & Aufhäuser Privatbankiers AG. All rights reserved.

Under no circumstances shall Hauck & Aufhäuser Privatbankiers AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities

This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organisational Requirements

Hauck & Aufhäuser Privatbankiers AG took internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of Hauck & Aufhäuser Privatbankiers AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

Hauck & Aufhäuser Privatbankiers AG uses the following three-step rating system for the analysed companies:

Buy: Sustainable upside potential of more than 10% within 12 months

Sell: Sustainable downside potential of more than 10% within 12 months.

Hold: Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of Hauck & Aufhäuser Privatbankiers AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analysed in this document was solely made by Hauck & Aufhäuser Privatbankiers AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of Hauck & Aufhäuser Privatbankiers AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.
